

Resident User Guide
For Android and IOS

mydoorview

Access Control with a View!

Whatever you call it... Panel, door box, call box, intercom, buzzer, kiosk, directory.....

...We call it a tele-entry and we've made it better.

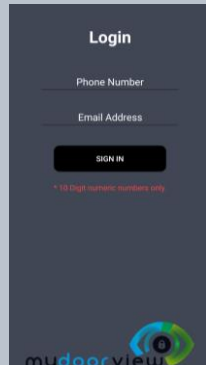

MyDoorView is a video tele-entry system

You have already been added to the system, now you just need to register, and here's how:

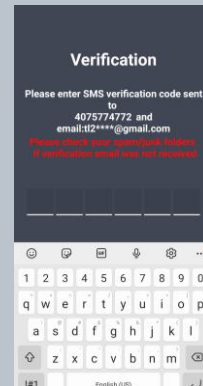

Step 1, download the app "mydoorview"

Step 2, accept all permissions*.

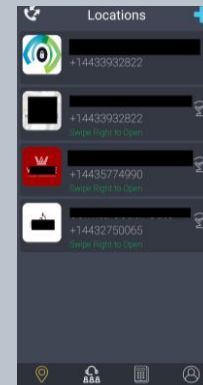

Step 3,

Log in

Enter PIN from text

Your assigned entry will be here

After you've registered your property manager will take care of the rest and soon you'll be receiving video calls from your door giving you piece of mind

***We promise to never solicit, sell your info, try to sell you a car warranty or in any other way violate your privacy. All phone permissions are for cached data only.**

...Really... we have no interest in the cat pics on your phone. 

Think we can do something better? Let us know! info@mydoorview.com

Features

With MyDoorView you will be able to hear and see who is at the door.

You can also create a call group to allow the call to go to multiple devices.

Additional Features

Depending on the type of system installed in your location and options chosen, you may have one or more of the following features in addition to the above.

- Send Guest PIN's
- License Plate reader
- Do not disturb

See your property manager for more information.
